

A WORD FROM THE PRESIDENT

Jean-Marc Waridel

Time is free, but it is very precious.
It doesn't belong to you, but you can use it.
You can't keep it, but you can spend it.
Once you lose it, you can never get it back.

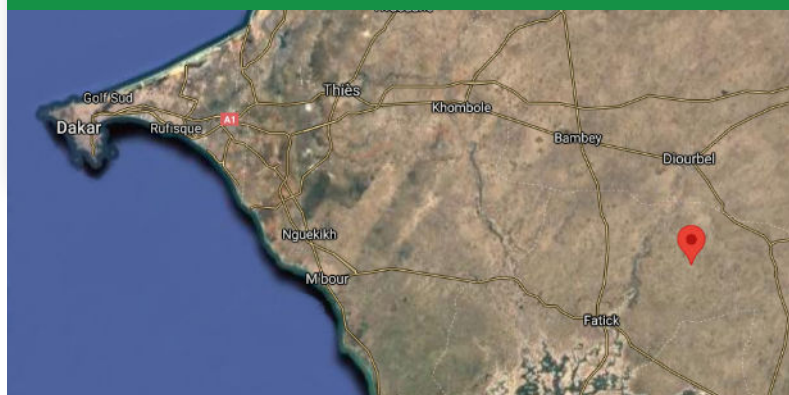

That's why, for the past 10 years, ADED has spent this precious time with amazing people, while cultivating happiness, gathering joy, and spreading cheer as much as possible!

"Everything that has a beginning has an end, but every end is the beginning of a new start."

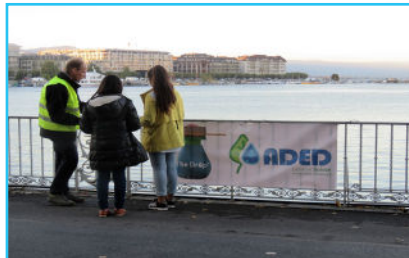

Quote about life, Serge Zeller

A new project in Senegal!

We have started a new project in Senegal with the support of Interaction! The project is carried out in the communes of Ndiagniao and Fandane in the department of Mbour and aims to reduce the risks of contamination of COVID-19 and other communicable diseases. The activities will be carried out in two elementary schools and in daraas. The students and their families live in difficult conditions and extreme poverty. We are grateful for this support and look forward to working with our local partner A.E.E.!

10 Years Of ADED Suisse

2010

first trip to Senegal

2011

creation of ADED Suisse

2012

training workshop in Senegal on the topic of pumps

2013

trip to Bolivia with a pump

2014

Salon des Solidarités in Paris

2015

trip to Cambodia

2016

first prototype of the faucet The Drop®

2017

quality tests on the new tap and first delivery of the faucets The Drop®

2018

participation in the Salon Aqua Pro Gaz and trip to Ecuador

2019

first installation of a potable water treatment system

2020

year of the COVID-19 pandemic and a trip to Karakalpakstan

2021

visit of projects in Senegal and Cameroon

Some memories of the 'daily life' of ADED Suisse. Over the past few years we have met valuable people who have invited us to discover their lives and to reflect and collaborate together to improve the conditions that can make life difficult. ADED Suisse has grown and is entering a new phase, which includes more new partnerships and projects in various countries of the world!

Our mission remains the same: to support people while using a participatory approach. The emphasis is still on the human relationship as the driving force for the transfer of skills, the strengthening of existing capacities in the countries of intervention and the close collaboration with our competent partners on site.

What is happening in Chad?

A little reminder... We started our project in Chad last January, in partnership with two local associations, Les Amis du Progrès 2 AP and Parvis des Enfants (ASPAEN), represented by their presidents Djasnabaye Samnalngar and Roger Dalam. Since February, our partners have started organizing events to offer hand washing stations to various schools, social centers and vulnerable families. These stations were locally manufactured and equipped with our The Drop® faucet. During the events, beneficiaries also received information on the importance of handwashing, communicable diseases, and instructions on how to use the tap properly.

The handwashing stations are ready to be distributed!

The ASPAEN facilitator shows the children the proper way to wash their hands.

ASPAEN's president is a photographer and videographer and we are grateful for all that he captured with his camera. This photo, taken in the Special Education Center for Retarded Children (CESER), was accompanied by a video of all the students, teachers and ASPAEN staff saying thank you to ADED.

In the picture is a young blind man, who is studying at the Centre de Ressources pour Jeunes Aveugles (CRJA). He wrote a song to thank ADED. The young people welcomed the handwashing stations with joy and one young person said that our The Drop® is a 'human' faucet, which acts 'like a person' and is perfectly adapted to his disability.

In May, the president of ASPAEN made a trip to Sarh, to visit our other partner and to do media coverage for the project. The two competent partners spent time together in the field doing demonstrations, visiting the different project sites and raising awareness among the beneficiaries.

A big thank you to both associations for their amazing work and selfless efforts to improve the lives of the project beneficiaries!

The Drop®, la belle aventure du robinet éco-sanitaire

Our coordinator Anne-Lize wrote an article in French, which was published on the website of the A.S.A.H. collective. The article talks about The Drop® and our

More news from Senegal!

In Tambacounda, Jérémie Kipré has installed a NEENE FOUTA rope pump. ADED collaborates with Jérémie to install pumps at his clients' homes.

This particular pump works with a simple, manual technology that allows groundwater to be easily brought to the surface. This well is 15 meters deep. In the coming weeks, a second pump will be installed in Sandiara.

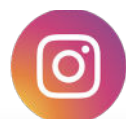

Another pallet of The Drop® taps has arrived at BushProof Madagascar!

We are grateful to work with Serge Antoine F. RANAIVOJAONA and his company, which was started by emergency relief and development professionals and specializes in water supply solutions for remote, isolated and difficult sites in Madagascar.

A new project...

In recent weeks, we have been preparing a dossier for a new, large project in a very special context: a refugee camp in Malawi! The project includes all the different aspects of Water, Sanitation and Hygiene. We hope to receive the necessary funding to start the project in January 2022.

Support ADED

Become a member of our association or invite your network to join the ADED family!

You will find our application form on the website.

Individual membership	CHF 50.- per year
Couple membership	CHF 75.- per year
Corporate membership	CHF 200.- per year

You can also make a donation (tax deductible in Switzerland, please contact us for France). Your donation makes a difference and saves lives!
